#### MAIN CONCLUSIONS

- A third of handpumps were found not working in round 2.
- The percentage of handpumps providing services that meet all service level indicator, is still very low (12%)
- There has not been a major improvements in the performance of WSMTs for SCs and STs since the baseline
- The service authority performed better in budget allocation and utilization and alignment of Water and Sanitation Plan with other district plans and budget in round 2 than in the baseline.
- More than half of households in East Gonja district depend on handpumps as their major source of water for drinking and other domestic uses, except in the wet season
