

# Strengthening Local Government Capacity to Deliver Water Services

Accra, 28 Sept 2017

Supporting water sanitation  
and hygiene services for life

Presented by:  
Veronica Ayi-Bonte

# Conrad N. Hilton Foundation grant

A strategic partnership between

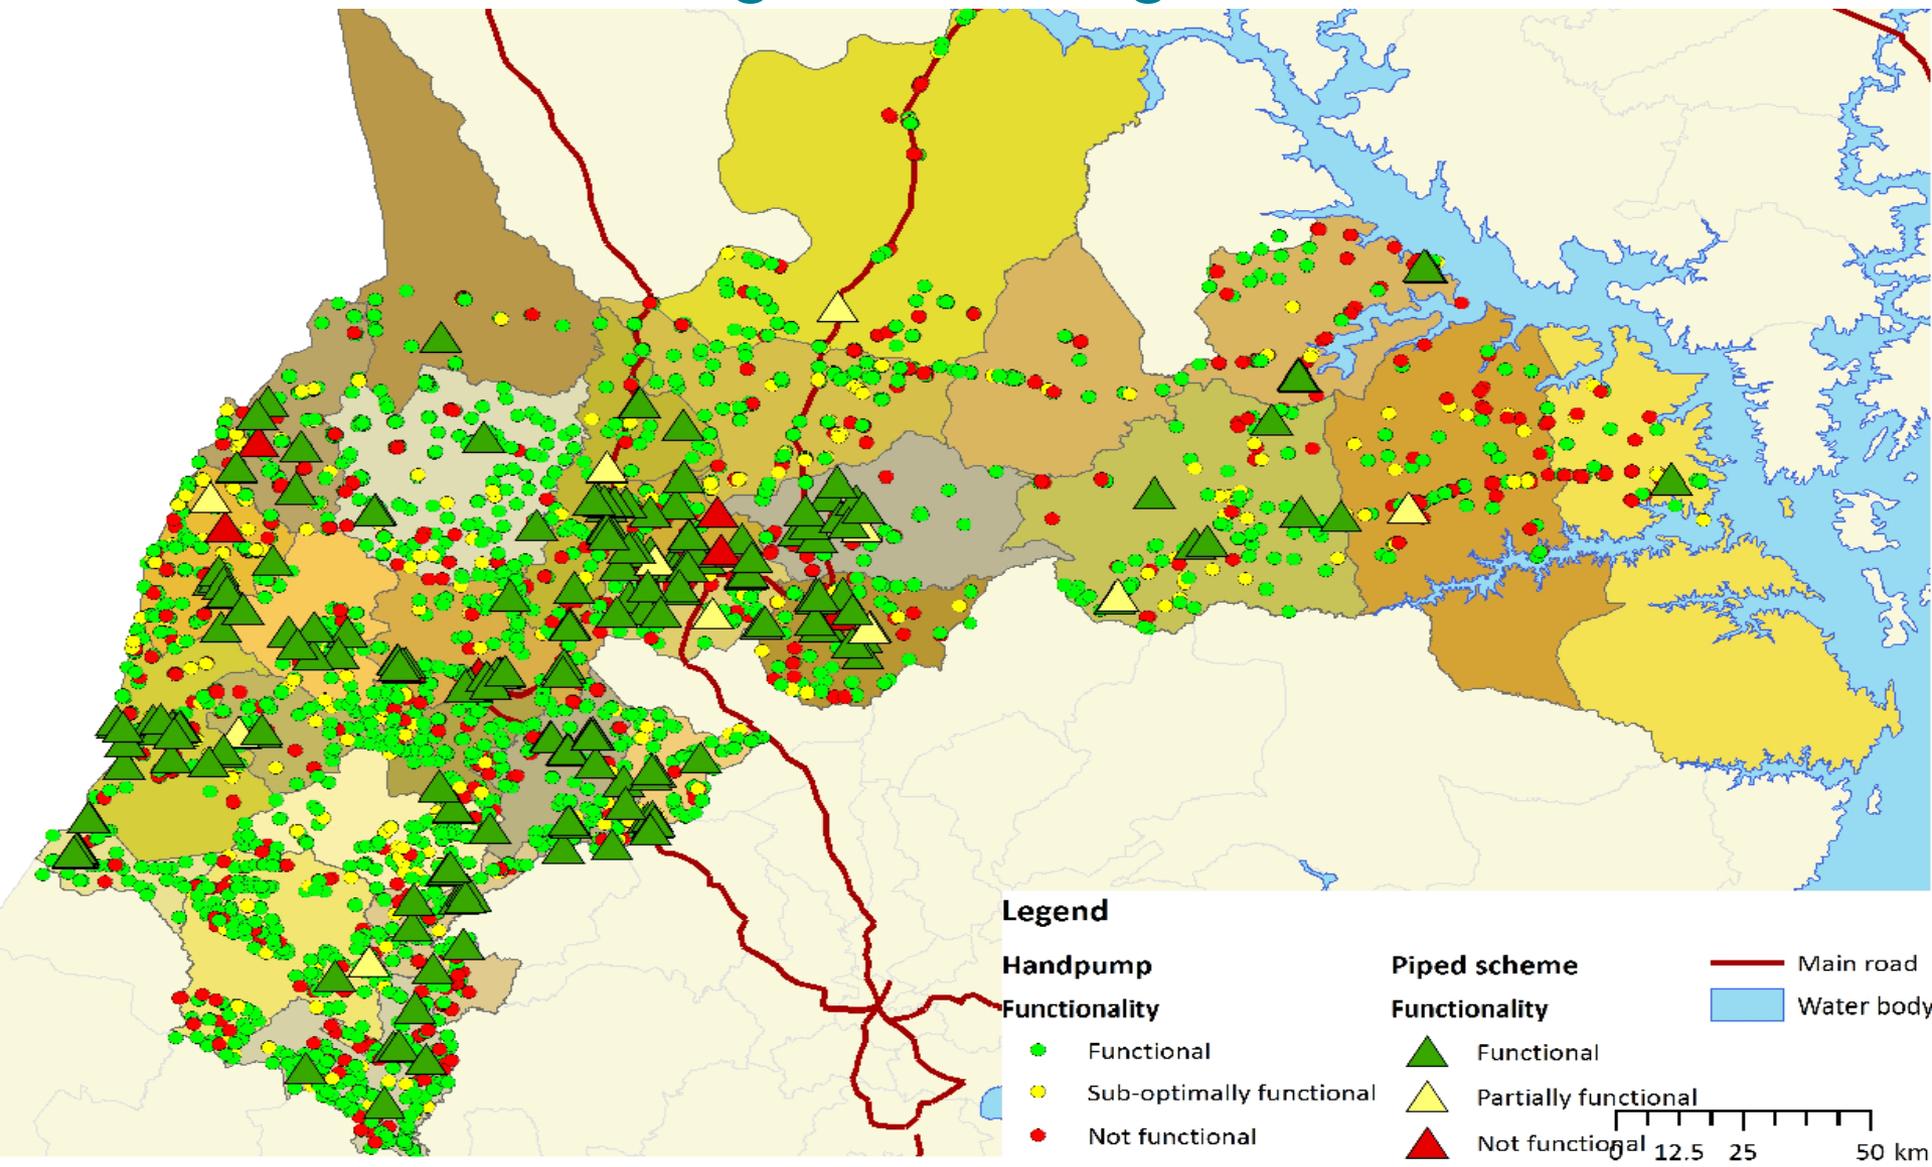

- IRC, Community Water and Sanitation Agency, World Vision, Safe Water Network, WaterAid, Desert Research Institute and 13 district assemblies

to cooperate and coordinate efforts better to maximize resources and jointly improve the systems for service delivery in districts.

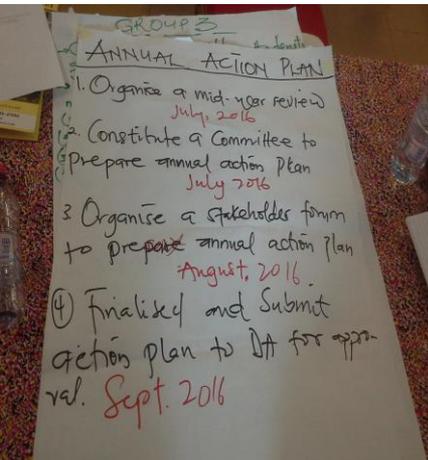

# Objectives

1. Preparation for successful project implementation
2. Continued experimentation for increasing sustainability of water supply in pilot districts
3. Scaling up the innovative service delivery tools and models from the 3 pilot districts to at least 10 additional districts.
4. Improving district level coordination, harmonisation and plan investments for universal coverage.
5. Advocacy and training for government and NGO partners in 5 regions
6. Strengthening the enabling environment at national level
7. Disseminating of lessons learned to international audiences

# Spatial Map: Inventory of Water Facilities, Brong Ahafo Region, Ghana

# Planning and Budgeting for Water service Delivery

# Remedial Actions : Providing renewed access and improved coordination of actors by districts

# Research Studies

1. Innovative financing for capital maintenance expenditure in small towns water systems in three districts in Ghana
2. Drivers and barriers to coordination and harmonisation of water service delivery at the district level
3. Achieving full coverage and sustainable service provision: the needs and the gaps
